

SAVE MONEY NOW!

Calculate your energy efficiency savings

Do you want to reduce the fuel and electricity costs at your facilities? Now you can. The potential for savings through improved efficiency is enormous. How much could you save? That depends on the decisions you make but experts say that many businesses have the potential to save up to 15 to 20 percent each year on their energy costs.

But how do you decide what equipment and energy efficiency options have the best payback? We can help. AHRP has partnered with Hartford Steam Boiler, a leading equipment specialist, to provide you with equipment efficiency calculators you can use to see what's driving energy costs in your business and learn how to save money on energy costs.

You'll see that these next-generation efficiency calculators encompass a wide range of energy hungry equipment and systems including: lighting, boilers, HVAC, electrical, mechanical equipment and more.

Access them online 24/7 free of charge; they're easy to use, all you'll need is readily obtainable input data. Within a few minutes, you can analyze your efficiency options, make informed recommendations and decisions and create concrete plans to achieve measurable energy and cost savings for your company.
